

VISHAL KUMAR RAO

Java Backend Developer | Spring Boot · Microservices · REST APIs · Cloud | 3 Years

+91-7004261579 | vishalbth99@gmail.com | Gurugram, India

LinkedIn | GitHub | LeetCode | GFG

SUMMARY

Java Backend Developer with **3 years of production experience** building enterprise-grade REST APIs, microservices, and cloud-native systems using **Java 17, Spring Boot, and Spring Security**. Proven track record delivering high-availability backend platforms for **10,000+ active users** on Azure and AWS. NIT Bhopal MCA graduate with **1,050+ DSA problems** solved. Experienced in full SDLC — from system design and database modeling to cloud deployment and production support.

EDUCATION

National Institute of Technology Bhopal (NIT Bhopal)

Aug 2020 – May 2023

Master of Computer Applications (MCA)

CGPA: 8.49 / 10

TECHNICAL SKILLS

Backend: Java 17, Spring Boot, Spring MVC, Spring Security (JWT, RBAC), Spring Data JPA, Spring Batch, Hibernate, REST APIs, Microservices

Languages: Java 17, Java 11, SQL, TypeScript, JavaScript (ES6+)

Databases: MySQL, PostgreSQL, Oracle SQL, Stored Procedures, Views, Indexing, Query Optimization, Schema Design

Caching & Messaging: Redis, WebSocket, Apache Kafka, Event-Driven Architecture

Cloud & DevOps: Microsoft Azure (App Services, Blob Storage, Azure SQL), Docker, Kubernetes, CI/CD Pipelines

Frontend: Angular, RxJS, HTML5, CSS3, HTTP Interceptors, Route Guards

Testing & Tools: JUnit, Mockito, Postman, Swagger/OpenAPI, Git, Maven, JIRA, Agile/Scrum

WORK EXPERIENCE

Truminds Software Systems

Gurugram, Haryana

Senior Software Development Engineer

Apr 2026 – Present

- Elevated to **Senior SDE** (Apr 2026); leading backend architecture decisions, conducting code reviews, and mentoring junior developers across the Partner Portal and Admin Portal platforms built on **Java 17, Spring Boot, and Microservices**.
- Spearheading **system design initiatives** and **API governance** across 6+ modules; defining coding standards, improving test coverage with **JUnit/Mockito**, and driving **CI/CD pipeline** improvements for faster, more reliable production deployments on **Azure**.

Software Development Engineer

Aug 2023 – Mar 2026

- Engineered **3 production-grade enterprise applications** — Partner Portal, Admin Portal, and PAN-India Mobile App — using **Java 17, Spring Boot REST APIs, and Spring Data JPA/ORM with Hibernate**, serving **10,000+ active dealers and distributors** across PAN-India Sale Registration, Lead Management, and Consumer Finance workflows.
- Implemented enterprise-grade **Role-Based Access Control (RBAC)**, authentication, and authorization using **Spring Security with JWT** and custom security filter chains, securing **5+ business modules** across **4 user roles** — Admin, Account Manager, Business Manager, and Regional Manager.
- Designed and optimized **MySQL/PostgreSQL** database objects including **stored procedures, views, and indexes**; leveraged **Spring Data JPA, JPA/ORM, and Hibernate** for data access with native SQL for performance-critical reporting paths.
- Architected an **end-to-end real-time notification system** using **WebSocket and Spring Boot scheduled tasks**, delivering push notifications for lead assignments, approval status updates, and coin reward events across all 3 platforms.
- Led **backend performance optimization** — introduced **Redis caching (Spring Cache)**, **indexed views**, and **server-side pagination** — reducing average **API response time by ~40%** and improving portal load performance for **10,000+ active users**.
- Deployed backend **microservices** on **Microsoft Azure App Services**; integrated **Azure Blob Storage** for document management, enabling **cloud-native, high-availability** infrastructure for PAN-India production workloads.
- Developed complex business logic for a **Coin and Cash Reward System** applying **Repository, Service Layer, and Factory design patterns**; built role-aware **Angular** frontend modules with reactive forms, route guards, and HTTP interceptors.
- Integrated **Swagger/OpenAPI, API versioning**, and centralized exception handling via **@ControllerAdvice**; collaborated in **Agile/Scrum** sprints across full **SDLC** — system design, SQL modeling, **CI/CD**, Azure deployment, and production support.

Software Development Engineer Intern

Feb 2023 – Jul 2023

- Developed **15+ RESTful APIs** using **Java, Spring Boot, and Spring Data JPA** for an enterprise document management system; built **Spring Batch** pipelines improving batch processing efficiency by **~50%**; wrote **JUnit and Mockito** unit and integration tests across all endpoints.

PROJECTS

VoiceAssist AI — Multi-Tenant Voice Customer Support Platform | Node.js, Express, Prisma, PostgreSQL, Socket.io, Twilio, LLM APIs

2026

- Architected a domain-agnostic support engine reachable over **chat, browser voice, and phone (Twilio)**, using a two-layer design where a config-driven **Intent-to-API registry** deterministically routes requests, so new business domains onboard through configuration with **no code changes**.
- Built the backend with **Node.js/Express, Prisma, and PostgreSQL**, implementing **multi-tenancy** (JWT-scoped `tenant_id` isolation across queries, sessions, and vector search), **RAG** over per-tenant documents (pgvector), and **LLM-based intent detection** with entity extraction.

ACHIEVEMENTS

- All India Rank 376** in NIMCET (National MCA Common Entrance Test) among **50,000+ candidates** — secured admission to NIT Bhopal MCA program.
- Solved **1,050+ Data Structures and Algorithms (DSA) problems** — **600+ on GeeksforGeeks** and **450+ on LeetCode** — covering arrays, trees, graphs, and dynamic programming.
